

Hsu Lab Phyo Pai

Full Stack Development

hsulabphyo.p66@rsu.ac.th | 0962178941 | Pathum Thani, Thailand

EDUCATION:

RANGSIT UNIVERISTY

2023 - Present

B.Sc. Information Technology

YANGON UNIV. OF FOREIGN LANGUAGE

2019 - 2020

Bachelor in Chinese Language

EI MON MON SWE ACADEMY

2020-2022

Web, Backend & DB development

SKILLS:

Languages

JavaScript · Python · SQL

Frontend

React · Tailwind · HTML/CSS

Backend

Node.js · REST API · JWT

Databases

PostgreSQL · MongoDB · Firebase

Tools

Git · GitHub · Supabase · Vercel

Analytics

Power BI · Excel · Tableau

LANGUAGE:

English

Fluent · IELTS Band 7

Chinese

Conversational

SUMMARY:

Final-year ICT student at Rangsit University with hands-on experience using React, Node.js, Firebase, and PostgreSQL. Comfortable working across the full stack from designing REST APIs and database schemas to building responsive, mobile-first UIs with a background in data analytics and a drive to build things that solve real problems.

EXPERIENCE:

WEB & DB DEVELOPMENT INTERN

JUL 2020 - SEP 2022

Ei Mon Mon Swe Academy, Yangon

- Built web projects using HTML/CSS/JS and worked on SQL schema design, normalization, and relational databases.

DATA ANALYST PART TIME

JAN 2024 - APR 2024

Rangsit International Language Center

- analyzed enrollment and operational data to support management decisions; produced structured reports using Excel.

PROJECTS:

PERSONAL FINANCE TRACKER

React · Node.js · PostgreSQL · Supabase · Recharts

- Full-stack app to track income & expenses with interactive chart visualizations and real-time data updates.
- Mobile-first responsive design (480px breakpoint) with category filtering and monthly summaries.

JOB APPLICATION TRACKER

React · Firebase · Tailwind · EmailJS · @dnd-kit | Deployed on Vercel

- A web app that helps job seekers stay organised during their job hunt by tracking every application on a visual board — from first apply to final offer.

REAL-TIME CHAT APP

React · Socket.io · MongoDB · Session Auth

- Multi-room WebSocket chat with live presence indicators, message history in MongoDB, and session authentication.
